Summary

Full Stack Web Developer that enjoys working in both ends. Always trying to create consistent layouts and components leveraging good CSS & HTML practices without forgetting a11y basic rules. For APIs I mainly focus on maintanability and performance by following good practices and using monitoring tools.

Experience

Full Stack Web Developer

Galilei App • Asuncion, Central   06/2014 - 02/2015

- Develop the web application using Angular.js and Bootstrap
- Develop Restful API using Python, Django, and NGINX in a DigitalOcean droplet
- Setup Google Analytics and monitor web servers through logs

Backend Developer

Buko App • Asuncion, Central   12/2015 - 04/2016

- Develop Restful API with Python and Django in a local managed server
- Implement algorithms to analyze and parse eBooks
- Manage a team of 3 Frontend developers and 1 Backend developer

Co-founder & Full Stack Web Developer

Hookode • Asuncion, Central   05/2016 - 05/2018

- Develop various basic websites and apps using Angular.js, React, Redux, and Bootstrap

- Develop various Restful APIs using Node.js, Express, MongoDB. and PostgreSQL in both DigitalOcean droplets and AWS EC2s

- Ocassionaly manage 1 or 2 developers when our projects needed more people involved

Full Stack Web Developer

AXS Map • New York, New York   01/2017 - 06/2018

- Develop PWA using React, Redux, Sagas, and no CSS framework deployed on AWS S3 and Cloudfront.

- Develop Restful API using Node.js, Express, and MongoDB intially deployed on a AWS EC2 and later with Zeit (now called Vercel) Now serverless service.

- Monitor both web app and api with a logging service called Sentry.

Co-founder and Full Stack Web Developer

Werta • Asuncion, Central   01/2017 - 12/2018

- Develop web app using React, Redux, Sagas, and no CSS framework. The app was hosted on AWS S3 and Cloudfront.

- For around 6 months I develop an alternative mobile app for our product using React Native, but the app was just provided on Android devices.

- Develop Restful API using Node.js, Express, Knex, and PostgreSQL. The API was deployed

on Zeit's (now called Vercel) Now serverless service.

- Monitor both web app and API with Sentry.

- Be part of 2018 summer batch of YCombinator by participating in StartupSchool and going to SF to present our project.

Front End Developer

On Campus Marketing • Ewing Township, New Jersey   05/2019 - 09/2019

- Develop SSR web app using React, Next.js, and Material UI. The app consisted on a backoffice dashboard in which universities admins could list clients and orders.

- Create and maintain a components library using Storybook.

- Develop responsive and a11y-compliant components.

Full Stack Web Developer & Tech Lead

Sweatworks • Arlington, Virginia   09/2019 - 10/2020

- The whole project consisted on a web app for events plannification of marathons.

- Develop Restful API using Node.js, Serverless, Sequelize, and PostgreSQL. The API was deployed with AWS Lambda, Gateway, and Cloudfront.

- Develop some pages and components of a SPA built with React, Redux, SASS, and Material UI.

- Refactor API to divide it in multiple services to enhance maintainability and the deployment process.

- For the last 4 months take the Tech Lead role to work closely with the client and stakeholders. Also prioritize tasks and manage a team of 4 Frontend developers and 3 Backend developers.

Skills

- JavaScript
- React
- PostgreSQL
- SASS
- Next.js
- Express
- Redis

- Node.js
- Serverless
- MongoDB
- Styled Components
- TypeScript
- AWS

Education

Software Engineering

Universidad Nacional de Asunción • Asuncion, Central   09/2016

Languages

- Spanish

- English
